The Vision team looks forward to connecting with you and the broader community!

# THINKING OF INVESTING IN A CATAMARAN? WHY NOW MAY BE THE BEST TIME

## FOR SOME, IT IS NOT A MATTER OF IF, BUT WHEN.

---

The decision to change one's life, to bargain with possibilities, to own a catamaran, is for some no longer a matter of 'if', but 'when'. Many of us are, understandably, looking for a change of pace in the unpredictable socio-economic landscape of today. With global headlines reflecting the insecurity of our futures, you could be weighing up the cost of a more independent and grounded way of life. Most of Vision's clients are full time live-aboards; a testament to the growing sentiment that waiting is no longer an option, and that time is too precious of a resource to waste.

## RISING GLOBAL TURBULENCE

---

With geo-political tensions on the rise; fuel costs skyrocketing; raw material scarcity; supply chain disruptions and rising costs, everyone is feeling the pressure to get their ducks in a row before the next storm.

## UNPREDICTABLE INCREASES IN IMPORT TARIFFS

---

Pertinent for US buyers, import tariffs saw a substantial increase mid last year and there are speculations of selective further increases towards the end of this year.

## MARKET SHIFTS

---

After a post-pandemic era boom in prices, the market has levelled out in 2026, making this the best time to invest in a catamaran in years.
